Education

Bangalore Institute of Technology

B.E. in Computer Science and Engineering

Kendriya Vidyalaya ASC Center

12th: 87.8% | 10th: 90.4%

2023 – 2027

CGPA: 8.44/10

Projects

Exercise Rep Counter | Computer Vision Project

Technologies: Python, OpenCV, MediaPipe, NumPy, Streamlit

- Developed a real-time computer vision system to detect and count exercise repetitions (squats, pushups) using MediaPipe pose estimation
- Extracted 33 body landmarks and computed joint angles using trigonometric functions for movement analysis
- Implemented a state-based transition model (DOWN → UP) to automate rep counting with consistent detection
- Improved accuracy by validating full range of motion and filtering out incomplete repetitions
- Built an interactive dashboard using Streamlit, providing real-time visual feedback (e.g., “Go Lower”, “Good Depth”) and live video overlays

CodeArena | Full-Stack Coding Platform

Technologies: Java, Spring Boot, React, MySQL/H2, JWT, REST APIs

- Built a full-stack coding platform supporting code submission, execution, and automated test case evaluation
- Designed a backend execution engine using ProcessBuilder to compile and run user-submitted code
- Implemented leaderboard system ranking users based on best submission scores per problem
- Secured backend APIs using JWT-based authentication with request filtering
- Developed scalable REST APIs for problem management, submissions, and evaluation workflow

Resume Analyzer and Job Matcher | Full-Stack Application

Technologies: Java, Spring Boot, React, REST APIs, PDFBox

- Developed a resume analyzer to extract skills from PDF resumes and match them with job descriptions
- Implemented keyword-based skill extraction and job matching logic
- Calculated match percentage and identified missing skills for resume improvement
- Designed REST APIs for file upload, processing, and result generation

Skills and Competencies

- **Languages:** Java
- **Web Technologies:** MongoDB, React.js, HTML, CSS, JavaScript
- **Databases:** MongoDB, MySQL
- **Problem Solving:** Data Structures & Algorithms (DSA)
- **Version Control:** Git, GitHub
